## **Multi-furcated Fiber-optic Cables**

Simultaneous multi-point measurements and Avantes multi-channel spectro-meters, require multi-furcated fiber-optic cables. These assemblies can function as a combiner or splitter of light as they have multiple legs on one side which converge into a single connector on the opposite side. Avantes offers virtually any combination possible, which can be adapted to your requirements.

Typical setups that require multi-furcated cables are:

- One sampling point such as an integrating sphere, cosine corrector or collimating lens being measured with several spectrometers (individual AvaSpecs or Multi-channel).
- Multiple illumination fibers splitting out from one light source to different sampling points.

Various types of connectors, jacketings and fiber sizes are available for these multi-furcated fiber cables. Contact us to configure and quote you on your specific needs.

## **Ordering Information**

FC4-UVIR200-2	$\bullet$ Four-furcated cable, 4x200 $\mu m$ broadband fibers , all legs SMA terminated, total 2 m long, splitting point in the middle
FC4-UVIR400-2	• As FC4-UVIR200-2, but with 4x400 µm broadband fibers
FC4-UVIR600-2	• As FC4-UVIR200-2, but with 4x600 μm broadband fibers
FC5-UVIR200-2	$\bullet$ Five-furcated cable, 5x200 $\mu m$ broadband $$ fibers, all legs SMA terminated, total 2 m long, splitting point in the middle
FC5-UVIR400-2	• As FC5-UVIR200-2, but with 5x400 μm broadband fibers
FC6-UVIR200-2	$\bullet$ Six-furcated cable, 6x200 $\mu m$ broadband fibers, all legs SMA terminated, total 2 m long, splitting point in the middle
FC6-UVIR400-2	• As FC6-UVIR200-2, but with 6x400 µm broadband fibers
FC8-UVIR200-2	$\bullet$ Eight-furcated cable, $8x200~\mu m$ broadband fibers , all legs SMA terminated, total 2 m long, splitting point in the middle
FC8-UVIR400-2	• As FC8-UVIR200-2, but with 8x400 µm broadband fibers

Other lengths available on request
