

Emerald Engine 516 nm / 1032 nm

Engine Pump Laser

- Emerald Engine is an Yb-fiber based pump laser with a pulse width of 2 ps, alternatively 5 ps. Emerald Engine Duo is equipped with a frequency doubling unit. Two beams are available: a frequency-doubled beam at 516 nm (> 3 W) and the undepleted fundamental beam at 1032 nm (> 0.75 W). The two beams are intrinsically synchronized and jitter-free.
- A high-power version with an output power of > 7 W for the frequency doubled beam and > 3.5 W for the fundamental beam is also available.

- Yb-fiber laser-based
- Green and IR beam are intrinsically synchronized and jitter-free
- Offers pulses as short as 2 ps with a spectral width of only 10 cm^{-1}
- Laser repetition rate stabilized by cooled base plate
- Windows based control software included
- Sync-out signal

Dimensions and Power

Dimensions	730 mm x 345 mm x 163 mm (Laser) 330 mm x 197 mm x 279 mm (Chiller) 19" x 4 U (Electronics)
Power	100 ... 240 V, 50 ... 60 Hz, max. 1200 W (Laser, Chiller, Electronics)
