

CARBIDE

Unibody-Design Industrial-Grade Femtosecond Lasers

FEATURES

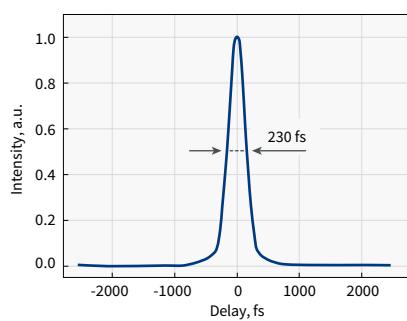

- 190 fs – 20 ps tunable pulse duration
- 800 μ J maximum pulse energy
- 80 W maximum output power
- Single-shot – 2 MHz repetition rate
- Pulse picker for pulse-on-demand mode
- Industrial-grade design
- Air- or water-cooled models
- Optional automated harmonic generator
- Optional scientific interface module

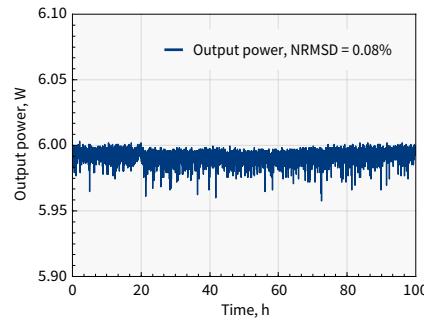

CARBIDE-CB3

CARBIDE is a series of femtosecond lasers combining high average power and excellent power stability. CARBIDE features market-leading output parameters without compromises to beam quality and stability. A compact and robust optomechanical CARBIDE design allows a variety of applications in top-class research centers, as well as display, automotive, LED, medical, and other industries. The reliability of CARBIDE has been proven by hundreds of systems operating 24/7 in the industrial environment.

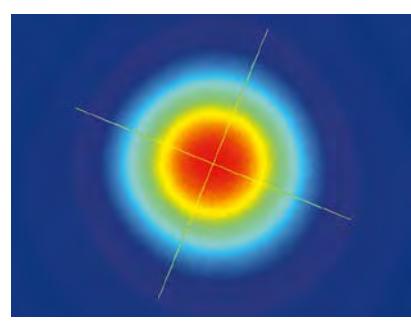

The tunability of CARBIDE lasers enables our customers to discover the most efficient manufacturing processes. Tunable parameters include pulse duration (190 fs – 20 ps), repetition rate (single-shot – 2 MHz), pulse energy (up to 0.8 mJ), and average power (up to 80 W). A pulse-on-demand mode is available using the built-in pulse picker. The CARBIDE lasers can be equipped with industrial-grade modules.

¹⁾ Water-cooled version available on request.

²⁾ Assuming Gaussian pulse shape.

³⁾ Precise wavelengths for specific models available upon request.

⁴⁾ FWHM, measured at laser output, using maximum pulse energy.

⁵⁾ Under stable environmental conditions.

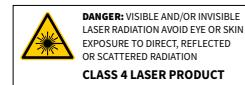

⁶⁾ Normalized to average pulse energy, NRMSD.

⁷⁾ Provides fast energy control; external analog control input available. Response time – next available RA pulse.

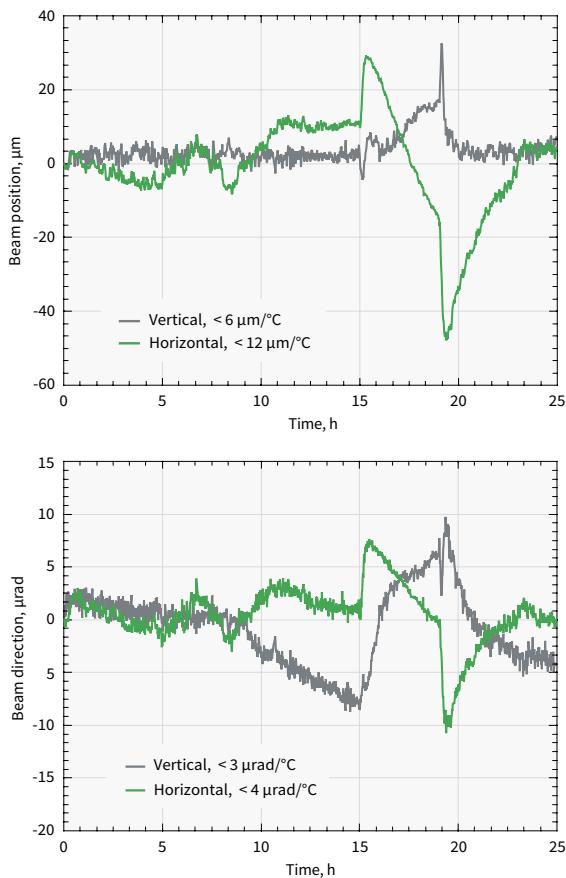

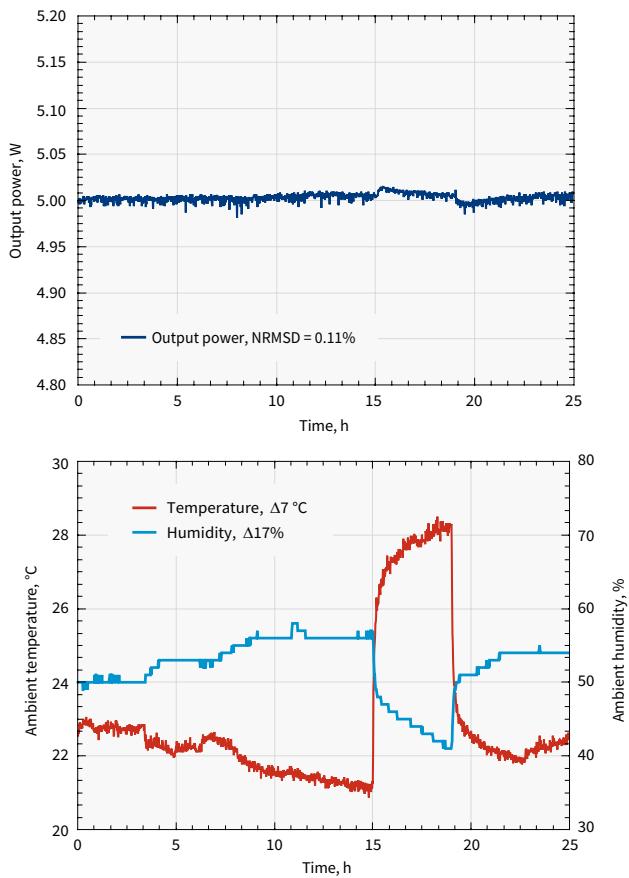

⁸⁾ Enhanced contrast AOM. Provides fast amplitude control of output pulse train.

⁹⁾ Custom spacing is available on request.

¹⁰⁾ Maximum number of pulses in a burst depends on the laser repetition rate. Custom number of pulses is available on request.

Automated Harmonic Generators

FEATURES

- 515 nm, 343 nm, or 257 nm output
- Automated harmonic selection
- Mounted directly on the laser head
- Industrial-grade design
- 30 W UV model option

CARBIDE lasers equipped with automated harmonic generators (HGs) provide a selection of fundamental (1030 nm), second (515 nm), third (343 nm), or fourth (257 nm) harmonic outputs using software control.

HGs are perfect for industrial applications that require a single-wavelength output. Modules, mounted directly at the output of the laser, are fully integrated into the system.
