

Why Choose Meadowlark Liquid Crystal Devices?

Industry-Leading Metrology – Meadowlark is the most experienced manufacturer of precision liquid crystal devices. Our proprietary measurement techniques provide you with extremely accurate calibration for every liquid crystal device we ship.

High Quality and Precision – When selecting a liquid crystal device, key performance features must be considered. These include wavelength dependence, temperature sensitivity, laser damage threshold, response time and aperture size. Our liquid crystal selection chart provides an at-a-glance review of our standard LC devices; as always, Meadowlark Solutions Engineers are happy to assist you in the process of selecting an LC component or controller that works for your application.

Custom Solutions – While we are delighted to provide you with one of our standard components or systems, we are also happy to customize a solution for you. Switching speeds, retardance values, wavelength ranges, coatings, sizes and shapes can all be modified to your specifications.

Did you know?

Meadowlark Optics was the first to develop a commercially available Liquid Crystal Variable Retarder? Our LCVRs are now the fundamental component used in the following devices and systems:

- Rotators
- Variable Beamsplitters
- Spatial Light Modulators
- Non-Mechanical Shutters
- Beam Steerers
- Optical Compensators
- Polarimeters
- Tunable Filters

About Meadowlark Optics

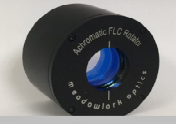

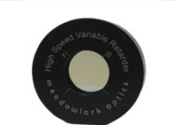

Innovating since 1979 – Meadowlark Optics has provided world-class polarization optics and liquid crystal solutions for a variety of applications for 43 years. To ensure precision and top quality, our 20,000 SF headquarters and manufacturing facility boasts the latest in clean rooms, optical fabrication, and metrology equipment. Need help selecting the right product for your application? Contact one of our Solutions Engineers to discuss your requirements.
